

BODY COMPOSITION HAS A MAJOR IMPACT ON PHYSICAL PERFORMANCE

THERE IS AN
EASY AND
ACCURATE WAY
TO ASSESS IT IN
YOUR DAILY
PRACTICE!

Lipowise makes your job easier and helps you improve your clients' results.

LIPOWISE SOLUTION

REVOLUTIONARY SKINFOLD CALIPER

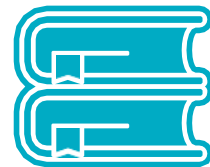

PORTABLE AND CONNECTED

Smart skinfold caliper, connected with *apps* and *cloud* platform.

SAVE TIME

Complete and personalized assessment in less time compared to other skinfold calipers.

SCIENTIFICALLY VALIDATED

More than 24 published articles and subject of several master's and doctoral theses.

Empowers professionals to improve people's lives

The **Lipowise** skinfold caliper is an accurate digital tool for assessing body composition, simplifying the daily life of healthcare professionals.

Maximise your clients' health and physical performance

Lipowise is a visionary tool with quality, precision, simplicity of use and unrivalled performance. It was designed and developed to help health and sports professionals improve the health and well-being of their clients, optimising body composition and improving physical performance.

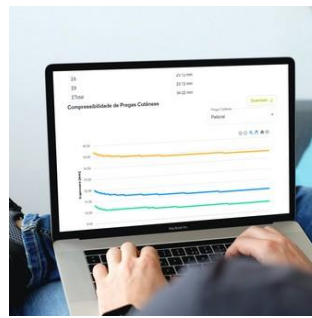

A connected, digital and smart solution

Lipowise is the first skinfold caliper that communicates via Bluetooth with iOS/Android apps. It securely integrates data into a cloud platform, which can be accessed via a web app.

MEASUREMENT

Lipowise is a digital tool that measures skinfold thickness 100 times per second, providing information on dynamic tissue compressibility.

FAST AND ACCURATE

Full body composition assessment with 6 skinfolds is 30% faster compared to other skinfold calipers. The results have a resolution of 0,1 mm.

MONITORING

You can choose and define multiple measurement profiles, with over 50 predictive equations for body composition, incorporating the best methods for assessing anthropometric data.

INTEGRATED SOLUTION

The Lipowise solution allows data to be collected from Bluetooth devices and sent to the GDPR-compliant cloud platform, facilitating remote data analysis.
